PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in full-stack web development and building scalable applications. Skilled in designing efficient systems, implementing modern web technologies, and working in structured development environments.

Demonstrates strong analytical thinking, problem-solving, and adaptability, with an interest in applying technology to support business operations and improve process efficiency.

EDUCATION

- University of Plymouth (NSBM Green University) (2022 – 2025)
BSc (Hons) in Software Engineering
- CAD Center Colombo (2019 – 2020)
Diploma in CAD & SolidWorks
- Loyola College Negombo
GCE O/L and A/L (Mathematics/2019)

EXPERIENCE

CodeBell (PVT) LTD | Oct 2025- March 2026

Full-Stack Developer Intern

- Delivered and maintained 3+ eCommerce web applications for live client use, translating business requirements into production-ready features and supporting continuous platform enhancements.
- Engineered scalable Firebase backend services for core business modules, streamlining data flow, reducing development rework, and supporting reliable feature expansion.
- Developed responsive frontend interfaces with React and Tailwind CSS across 15+ key pages, improving usability and ensuring consistent performance across devices.
- Implemented authentication, Firestore database structures, payment integrations, and hosting services to enable secure end-to-end application delivery.
- Built and integrated REST APIs and third-party services to support business workflows and operational efficiency.
- Managed deployment, testing, debugging, and post-release maintenance, helping ensure application stability and timely issue resolution.
- Collaborated with clients and cross-functional teams to gather requirements, deliver new features, and improve overall user experience.

PROJECTS

SewaGuru – Home Service Marketplace Web App (MERN Stack) | [SewaGuru Live](#)

- Created a multi-role service platform with customer and provider flows, delivering authentication, booking, and payment features across 4+ core user journeys.
- Implemented REST APIs with secure session handling for 6+ endpoints, strengthening access control and improving request reliability during end-to-end testing.
- Connected Stripe and Google Maps APIs to support payments and location-based services, enabling 2 critical integrations within the booking workflow.

Organic Garden – eCommerce Web Application | [Organic Garden Live](#)

- Launched a full eCommerce website with product browsing, cart, and checkout across 8+ core pages, delivering a complete shopping flow from discovery to purchase.
- Designed responsive user interfaces with React and Tailwind CSS, optimizing layouts for mobile and desktop views and improving consistency across major breakpoints.
- Implemented backend logic and Firebase database structure for product, cart, and order data, supporting 3 essential workflows with real-time updates.
- Orchestrated payment processing, order workflows, and live deployment, enabling end-to-end transaction handling and reducing manual order steps by an estimated 25%.

My Portfolio Website – Interactive Developer Portfolio | [Portfolio Live](#)

- Created an interactive portfolio website showcasing 3+ projects, technical skills, and experience, strengthening personal branding and presenting work in a structured format.
- Designed responsive interfaces with React, Tailwind CSS, and GSAP animations across 5+ sections, improving visual engagement and cross-device consistency.
- Embedded Three.js 3D models and scroll-based animations to enrich user experience, adding 2 advanced interactive elements without compromising navigation flow.
- Optimized performance, responsiveness, and deployment for a smooth cross-device experience, reducing load inefficiencies by an estimated 20% during testing.

TECHNICAL SKILLS

- **Frontend:** React.js, Vite, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), GSAP, Three.js
- **Backend:** Node.js, Express.js, Firebase, PHP
- **Database:** MongoDB, MySQL, Firestore
- **Tools & Platforms:** Git, GitHub, Postman, Supabase, VS Code
- **Concepts:** REST APIs, JWT Authentication, Responsive Design, Scalable Web Applications

ADDITIONAL

- Familiar with Agile development practices and Git-based workflows
- Experience with deployment using Firebase and Vercel
- Strong ability to learn new technologies quickly and adapt to new environments
